	Inputs	Processes	Outputs	Contributions
Systematic Literature Review	Conference Papers	Conduct literature review with guidelines suggested by Boland et al., 2017	Understanding of state-of-the-art adaptations for subtitled media and the challenges faced for specific communities of focus when consuming media	of subtitle adaptation
	Journal Articles			
Design space exploration of subtitle adaptation	Identified research gaps	Conduct interview with Speech and Language Therapists  Conduct survey with People with Aphasia	Understanding of how People with Aphasia consume subtitled media and current challenges they face	Empirical & Theoretical Contributions - draw up user requirements and design recommendations for subtitle adaptation from interview and survey
	Speech and Language Therapists			
intervention	People with Aphasia			
Implementation of subtitle adaptation intervention	User Requirements	Implementation of subtitle adaptation intervention, following insights gained from interview and survey	High-fidelity subtitle adaptation intervention	Artefact Contribution - novel system/interaction technique that is reusable across myriad situations of People with Aphasia consuming subtitled media
	Design Recommendations			
	High-fidelity subtitle adaptation intervention	Conduct usability testing against People with Aphasia	Understanding of the change of People with Aphasia's overall experience of interacting with the subtitle adaptation intervention compared to the existing subtitle adaptation interventions	Aphasia's experience of
Testing and Evaluation of subtitle adaptation intervention	Existing subtitle adaptation interventions from systematic literature review database
